Dear Dr. Downer:

Subject: National Historic Preservation Act (NHPA)
Request to Initiate Section 106 Consultation
Kihei No. 7 Force Main Replacement
Clean Water State Revolving Fund (CWSRF) Project No. C150077-32
Kama'ole Ahupua'a, Makawao District (Traditional District of Kula), Island of Maui
TMK: (2) 3-9-005:030 and 999 (South Kihei Road Row)
State Historic Preservation Division (SHPD) Project No. 2021PR00474

On behalf of the Environmental Protection Agency (EPA), the State of Hawai'i Department of Health (DOH) requests to initiate Section 106 consultation with the State Historic Preservation Officer (SHPO) for the proposed Kihei No. 7 Force Main Replacement project located in Kama'ole Ahupua'a, Makawao District (Traditional District of Kula), Island of Maui.

The proposed project may be eligible to utilize federal funding that is administered by the DOH through the CWSRF and will be considered a federal action and undertaking, as defined by Section 106 of the NHPA of 1966 (as amended 2014), Title 54 of the United States Code (54 USC) Section 306108, and Title 36 of the Code of Federal Regulations (36 CFR) Part 800.

The EPA has authorized the DOH to act on behalf of the EPA regarding NHPA Section 106 notification and consultation. This letter is to request to initiate the Section 106 consultation process with the SHPO and SHPD in accordance with 36 CFR, Section 800.3.

The DOH may provide funding under the CWSRF to the County of Maui, Department of Environmental Management for the Kihei No. 7 Force Main Replacement project.

Overview of Undertaking

The project consists of replacing the existing 20-inch ductile iron force main with a new 20-inch PVC force main that will be constructed in parallel along the same corridor. The new 20-inch force main extends approximately 1,550 linear feet along South Kihei Road, starts from the Kihei No. 7 Pump Station near Kamaole Beach Park No. 1, and reconnects to the existing sewer system near Kaiu Place. The entirety of the project is within the South Kihei Road paved

roadway except for a small portion which is contained within the Kihei No. 7 Pump Station site. See *Attachments A and B*.

Cultural, Historical, and Archaeological Background

The area of potential effects (APE) for the project encompasses approximately 0.2 acres, with work proposed along roadways and within wastewater pump station (WWPS) sites. While the APE has not previously undergone an archaeological inventory study (AIS) itself, there have been many archaeological projects conducted along and nearby the route. There are multiple sites in the general area of the corridor and WWPS locations but, notably, no sites have been documented within the current APE.

The State Historic Preservation Division (SHPD) was previously consulted for this project (SHPD Project No. 2021PR00474). The Archaeological Monitoring Plan (dated November 10, 2021), prepared by Xamanek Researches LLC, was reviewed and accepted by SHPD on November 17, 2021 (See *Attachment C*).

In summary, the Archaeological Monitoring Plan (November 10, 2021) includes a scope of work, a historic background section, a summary of known historic properties in the area, and the following archaeological monitoring stipulations:

- On-site monitoring will be conducted for all ground-disturbing activities. One monitor is required for each piece of ground altering machinery during this project;
- A coordination meeting will be conducted between the construction team and the monitoring archaeologist before construction activities so that all parties are aware of the need for archaeological monitoring, the archaeological provisions detailed in this plan, and the responsibility of the construction team to ensure that no ground-disturbing work is conducted without an archaeological monitor present;
- The archaeological monitor has the authority to temporarily halt all activity in the area in the event of a potential historic property being identified or to record archaeological information for cultural deposits or features;
- If non-burial historic properties are identified, documentation shall include, as appropriate, recording stratigraphy using USDA soil descriptions, GPS point collection, recordation of feature contents through excavation or sampling of features, screening of features, representative scaled profile drawings, photo documentation using a scale and north arrow, and appropriate laboratory analysis of collected samples and artifacts. Additionally, photographs and profiles of excavations will be collected from across the project area even if no significant historic properties are encountered. The profiles will measure a minimum of 2 meters across. Both vertical and horizontal scales will be recorded;
- If human remains are identified, work will cease in the vicinity, and the find shall be secured, and provisions outlined within the Hawaii Revised Statutes (HRS) 6E-43 and HAR 13-300-40, and any SHPD directives, shall be followed; and
- Collected materials not associated with burials will be temporarily stored at the archaeological firm's office/laboratory until an appropriate curation facility is selected, in consultation with the landowner and the SHPD

Consultations

Section 106 consultation letters have also been sent to Native Hawaiian organizations, consulting parties, and/or interested persons that might attach significance to this area and have invited them to participate in the process. The mailing list is provided as *Attachment D*.

We welcome any comments that you may have on this project's proposed improvements.

We are particularly interested in any information you may have on the historic and cultural sites that have been recorded in the area. In addition, if you are acquainted with any persons or organizations that are knowledgeable about the proposed project area or any descendants with ancestral, lineal, or cultural ties to, cultural knowledge or concerns for, and/or cultural or religious attachment to the proposed project area, then we would appreciate receiving their names and contact information.

We would appreciate a written response within thirty (30) calendar days from receipt of this letter. Please address any written comments to email: jonathan.nagato@doh.hawaii.gov or the following address:

IN REPLY REFER TO:
Project No. 2021PR00474
Doc. No. 2111IK09
Archaeology

Dear Eric Nakagawa:

**SUBJECT: Chapter 6E-8 Historic Preservation Review -
County of Maui, DEM Job No. WW19-04
The Kihei No. 7 Force Main Replacement Project
Archaeological Monitoring Plan
Kama'ole Ahupua'a, Kula Districts, Island of Maui
TMK: (2) 3-9-005:030 and 999 (South Kihei Road ROW)**

This letter provides the State Historic Preservation Division's (SHPD's) review of the draft archaeological monitoring plan (AMP) titled, *An Archaeological Monitoring Plan for the Kihei No. 7 Force Main Replacement Project (DEM Job. No. WW19-04)*... (Fredericksen, revised November 2021). SHPD received the draft AMP on November 5, 2021 (Submission No. 2021PR00474.003) and requested minor revisions to the plan. SHPD received the revised AMP on November 10, 2021 (Submission No. 2021PR00474.005). Previously, SHPD did not concur with the County of Maui DEM's project effect determination of "No historic properties affected" and requested archaeological monitoring be conducted for the proposed project for identification purposes (September 28, 2021; Project No. 2021PR00474, Doc. No. 2109IK09).

The County of Maui, DEM, Wastewater Reclamation Division proposes to install a new 18-inch sewer force main and sewer manholes on South Kihei Road. The project area comprises 0.2 acres within the County right-of-way (ROW). The proposed ground disturbances will include excavation of trench (~1,500 linear ft x 4 ft wide x 15 ft deep).

Xamanek Researches, LLC produced the subject AMP (Fredericksen, revised November 2021) in support of the proposed project. The AMP includes a scope of work, a historic background section, a summary of known historic properties in the area, and the following archaeological monitoring stipulations:

- On-site monitoring will be conducted for all ground-disturbing activities. One monitor is required for each piece of ground altering machinery during this project;
- Prior to construction activities. A coordination meeting will be conducted between the construction team and the monitoring archaeologist prior to construction activities so that the team is aware of the need for archaeological monitoring, the archaeological provisions detailed in this plan, and the responsibility of the construction team to ensure that no ground disturbing work is conducted without an archaeological monitor present.
- The archaeological monitor has the authority to temporarily halt all activity in the area in the event of a potential historic property being identified or to record archaeological information for cultural deposits or features;

- If non-burial historic properties are identified, documentation shall include, as appropriate, recording stratigraphy using USDA soil descriptions, GPS point collection, recordation of feature contents through excavation or sampling of features, screening of features, representative scaled profile drawings, photo documentation using a scale and north arrow, and appropriate laboratory analysis of collected samples and artifacts. Additionally, photographs and profiles of excavations will be collected from across the project area, even if no significant historic properties are encountered. The profiles will measure a minimum of 2 m across. Both vertical and horizontal scales will be recorded;
- If human remains are identified, work will cease in the vicinity, and the find shall be secured, and provisions outlined within the Hawaii Revised Statutes (HRS) §6E-43 and HAR §13-300-40, and any SHPD directives, shall be followed; and
- Collected materials not associated with burials will be temporarily stored at the archaeological firm's office/laboratory until an appropriate curation facility is selected, in consultation with the landowner and the SHPD.

The AMP (Fredericksen, Revised November 2021) meets the minimum requirements of HAR §13-279-4. **It is accepted.** Please send two hard copies of the document, clearly marked FINAL, along with a copy of this letter and a text-searchable PDF version of the AMP to the Kapolei SHPD office, attention SHPD Library. Also, submit a text-searchable PDF copy of the final AMP to HICRIS Project No. 2021PR00474 using the Project Supplement option and a PDF copy of the AMP to lehua.k.soares@hawaii.gov.

SHPD hereby notifies the County of Maui that the archaeological monitoring plan has been accepted and the permit issuance process may continue.

SHPD requests written notification via email and HICRIS at the start of archaeological monitoring. Within 30 days of completion of archaeological monitoring fieldwork, SHPD looks forward to receiving for review and acceptance a brief archaeological monitoring letter report of findings as specified in HAR §13-282-3(f)(1). Subsequently, SHPD looks forward to receipt of an archaeological monitoring report meeting the requirements of HAR §13-279-5 for review and acceptance.

Please submit the monitoring report and submission review fee and all other project documents and correspondence to HICRIS Project No. 2021PR00474 using the Project Supplement option.

Please contact 'Iolani Kauhane, Historic Preservation Archaeologist III, at Iolani.Kauhane@hawaii.gov for matters regarding archaeological resources or this letter.

Aloha,

Alan Downer
